

Crops

(Story word: carrots)

If a big plot of land has a lot of plants in it, and they were planted by men, the plants are said to be a crop.

Lots of plants can be crops, such as: plums, figs, carrots, melons, and catnip. Cotton is a crop, as well.

You have to get crops wet often, and not let bugs or pests kill them. Frost can kill crops as well, but you cannot stop frost. You just have to trust good luck on some things.
