

Now It's Spring

Get rid of the sled. Pack up your mittens and hats. A thin jacket is just what you want.

Now, it's spring!

What happens in the spring?

Grass pops up.

The robins are back. They have a nest with eggs.

The ducks are back as well. They are in the pond.

Frogs sing in the spring.

There is more sun in the spring, but spring can be damp and wet too.

Drip, drop, drip, drop. You will get wet. Yuck!
Your pants and socks are damp.

The next day, you will bring an umbrella with you, and you will not get wet.
